INNOVEX PIPE PUSHER™

Innovex pride ourselves on delivering our customer with solutions for inserting, aligning, lifting or re-rounding PE pipes in the utilities sector. By simply attaching the Pipe Pusher™ to the excavator arm you take away the manual handling and injury risks associated with pipe insertion. The Innovex Pipe Pusher excavator attachment offers a safer and more compliant way of inserting new PE pipe, approved to work on both live and dead insertion.

The Pipe Pusher™ is fully operated from the safety of the excavator cab and is compatible for use with the large majority of 8T to 35T excavators. It can also be used for maneuvering & re-rounding pipe diameters from 500mm/18" up to 800mm/30".

BENEFITS

- Efficient, easy mounting and installation
- Durable & robust in challenging environments
- Safe insertion solution and enables longer sections of pipe to be inserted easily
- Action can be reversed to pull back if an obstruction is met, something not possible with other insertion methods
- The 800mm model includes a shim that enable use on 630mm pipes too. Giving the best possible grip and release system across the market even in all conditions.
- We recommend training before using this product both in technique and ability.
- Due to the continual push there is little to no visible movement of the host main, virtually eliminating the chance of damage
- Pushes 12 metres every 51 seconds - with typical lengths in excess of 300m being pushed in at any one time
- Swivel head allows pipe to be positioned ready for insertion

SIZES

> 800mm

Customised Models available, designed to accommodate clients specialist requirements

Attaches to large excavators e.g. 8 tonnes - 35 tonnes
